Protect your desktop, files, and passwords with PassMan. When activated, this  
Page 6

info[1]

program takes over your entire desktop, denying access to anyone without the proper password. Once inside, you can safely add passwords, credit card numbers, and other sensitive data to a handy list. PassMan logs and reports all unauthorized access attempts. It also allows you to link any website, program, or document to the user interface, enabling you to keep all of your frequently used places and applications in one central location. You can also use PassMan to encrypt your sensitive data. Just select a file and enter a password to complete the operation. PassMan prompts you to delete the original file and provide an optional link for easy access. It's easy to use, includes online help, and provides excellent desktop security. Try it for free for 15 days.<BR><I>Reviewed on Apr 07 1999</I>.<p>
